

## Safe2Login Helpful Tips

- How do I Change my Safe2Login Profile (i.e. email address, password, SafeCode)?

Click on the link in the Safety Stamp that contains the SafeCodes labeled "Click Here if your SafeCode is not listed". Enter your email address and Safe2Login password. Click sign on. On the left side of the screen select the Member's area and follow the instructions.

- How do I Register a new Computer or add an additional computer?

Click on the link in the Safety Stamp that contains the SafeCodes labeled "Click Here if your SafeCode is not listed". Enter your email address and Safe2Login password. Click sign on. In the "Identify your Computer" section click on "add a new computer".

- Why did I not receive an email with an activation code in order to complete registration?

Verify that your email account does not have Spam controls set that do not allow incoming mail from approved senders to be received. Make the necessary changes on your email account and request your activation code be resent.

- Why would it be necessary to revalidate my Safe2Login account occasionally?

If settings in Internet Options automatically delete cookies on occasion the next attempt to login will require you to revalidate since the cookie session is not detected. To avoid the Safe2Login cookie from being deleted setup Safe2Login as a managed site do the following:

1. Launch your browser
2. Click on "Tools" > "Internet Options"
3. Click on the Privacy tab
4. Click on Sites in the Settings section
5. Enter in the address of web site [www.safe2login.com](http://www.safe2login.com)
6. And click Allow and OK to exit
